

Post-doctoral Fellowship HERACLES Cardiovascular Research Network and Barcelona Municipal Institute for Medical Research (IMIM)

The **HERACLES Cardiovascular Research Network** and the Cardiovascular Epidemiology and Genetics Research Group of the Inflammatory and Cardiovascular Processes at Barcelona's Municipal Institute for Medical Research (**IMIM**) (see www.imim.es and www.prbb.es) offers a post-doctoral research fellowship in the epidemiology of cardiovascular diseases.

Research agenda: Within a multidisciplinary research environment (HERACLES, www.redheracles.net), the post-doctoral fellow will participate in a population register of myocardial infarction (REGICOR), etiological studies of biomarkers for coronary disease, and preparations for future European projects on population screening to improve cardiovascular disease prevention. The 12-month fellowship will begin **between January and April 2010**, to be negotiated with the successful applicant.

Applicant qualifications: Required qualifications include a medical degree and postgraduate training in epidemiology (master's degree or similar); preparation in preventive medicine and/or public health preferred. Doctoral defense must have been completed within the past 6 years (after 1/1/2004) or be projected by March 2010.

Demonstration of good oral and written communication skills in English is essential.

Application process: Applicants must submit a 1-page letter detailing their interest in this position and a current CV, **following the model posted at www.redheracles.net**, as attachments sent by e-mail to the HERACLES Network Coordinator, Dr. Jaume Marrugat (jmarrugat@imim.es).

Deadline: E-mailed documents must be submitted **no later than 22 December 2009**.
